Dear New Employee:

As one of the newest additions to Cleveland Center’s team of professionals, please accept my warm welcome! Our employees not only work hard at being the best that they can be, they also make this a great place to work and promise to help you be your best, too.

I am certain that your positive attitude along with your knowledge and abilities, will make you an integral part of our winning team. You are the future of Cleveland Center and the FAA! And as you develop your skills, you will play more and more of an essential role in the continuing mission of providing the safest, most efficient aerospace system in the world.

One of the FAA’s values is its people – they are our strength. And our success depends on the respect, diversity, collaboration, and commitment of our workforce. We encourage you to ask questions and express your thoughts; we foster creativity and vision to provide solutions.

We aim to involve everyone in making our facility an outstanding place to work and want to make your time here enjoyable but productive; rewarding yet challenging. And above all, we want to ensure that our employees are professional, engaged, and enthusiastic about the job they do!

Again, welcome to the Cleveland Center team! I look forward to working with you.

*Cindy Alexander*

Cleveland Center Air Traffic Manager
and the Cleveland Center Leadership Team
Our Mission:

Our continuing mission is to provide the safest, most efficient aerospace system in the world.

Our Vision

We strive to reach the next level of safety, efficiency, environmental responsibility and global leadership. We are accountable to the American public and our stakeholders.

Our Values

- **Safety is our passion** We work so all air and space travelers arrive safely at their destinations.

- **Excellence is our promise.** We seek results that embody professionalism, transparency and accountability.

- **Integrity is our touchstone.** We perform our duties honestly, with moral soundness, and with the highest level of ethics.

- **People are our strength.** Our success depends on the respect, diversity, collaboration, and commitment of our workforce.

- **Innovation is our signature.** We foster creativity and vision to provide solutions beyond today's boundaries.
About Cleveland Center

In June of 1936, Cleveland Center was first operated from small quarters inside the terminal building at the Cleveland Municipal Airport, now Cleveland Hopkins International Airport. As air traffic grew, facilities were moved into a hangar on the field and from there to a space at the Cleveland Ordnance Plant of the Cadillac Motor Car Division.

On February 7, 1961 the FAA commissioned the Cleveland Air Route Traffic Control Center's new building in Oberlin, Ohio. The building was erected in 1959 at a cost of approximately five million dollars with Thomas B. Bourne Assoc., Inc., Engineers & Architects, Washington D.C. and Jennings & Churella, Inc., Engineers & Contractors, New London, Ohio.

The Cleveland Air Route Traffic Control Center is currently the fifth busiest en route facility in the United States, and at times, has been the busiest. In 2001, Cleveland won an air traffic facility of the year award. Controlling airspace over parts of seven states and a small part of Canada, Cleveland handles traffic flows to some of the busiest airports in the country. Traffic to Chicago, New York, Detroit, Philadelphia and Washington area airports are sequenced and given their initial descents. Traffic en route to many other parts of the country pass through Cleveland’s central location.

The facility houses an eight area, 50 plus radar screen control room with more than 400 controllers and developmentals, a weather unit, and a traffic management team. A training department complete with simulation lab, classrooms, and computer based instruction workstations is on site. Cleveland Center also has an invaluable staff of technical and administrative personnel supporting the operation.
Cindy Alexander, Air Traffic Manager

Cindy Alexander is our Air Traffic Manager, arriving here on August 14, 2012. She comes to us from New York ARTCC where she has been working with their Interim Leadership Team. She has considerable enroute experience, starting out at Jacksonville Center in 1981, where she was a controller, Airspace Specialist, and Traffic Management Coordinator (TMC). In 1991, she became a supervisor at Denver Center and also worked as a Supervisory TMC before taking on the duties of Support Manager for Quality Assurance, which later combined with Training. Cindy became an Operations Manager in 2001, the Staff Manager in 2009, and then became the Executive Officer (XO) in early 2010. She was selected as the Acting Senior Advisor in Western EnRoute in December 2010, and in September 2011 she was asked to work with the Interim Leadership Team at ZNY. She was the Acting Staff Manager there from October 2011 until coming here to Cleveland Center.
Mark S. Madden, Executive Officer

Mark Madden is the Executive Officer at Cleveland Center. He has worked at Cleveland Center since 1982 in a variety of roles since starting his career as a controller in Area 4. Mark has been involved in many airspace and route redesign projects as well as redesign of sectors and area configurations. Implementation of new automation systems like the National Traffic Management Log (NTML) and the Enroute Status Information System (ESIS) are some of his accomplishments. Mark was born and raised in northeast Ohio. His education includes a bachelor's degree in Aerospace Flight Technology from Kent State University. Experience as a multi-engine instrument flight instructor, as well as charter and freight pilot experience, provides him with an insightful perspective for our customer’s concerns. Mark and his wife Sandra live in Cuyahoga Falls near the Cuyahoga Valley National Park. They take advantage of the park’s hiking and biking trails. Outside interests include golfing and reading crime, mystery, and military history books. He also is a sports fan and likes to follow the Browns, Cavs, and Indians. Mark listens to all types of music and his favorite artist is Bruce Springsteen. Mark has an open door policy and is available in his office which is adjacent to the Air traffic Manager's office.

James T. Gomoka, Traffic Management Officer

Jim Gomoka is Cleveland Center’s Traffic Management Officer (TMO). He began his career as an Air Traffic Controller in the United States Air Force in 1984, as a Tower controller at K I Sawyer AFB. He entered the FAA in 1988 and was assigned to Cleveland Center, where he worked as an Area 5 CPC and as a Traffic Management Coordinator (TMC). In 1995, he was selected as an En Route and Terminal instructor at the FAA Academy in Oklahoma City. After several years at the academy and a detail to Headquarters as the team lead for developing the FAA Cost Accounting System, Jim became a Supervisor at Washington Center, working in multiple areas including Traffic Management as a Supervisor (STMC). After working at the newly opened Potomac Consolidated TRACON as an STMC, Jim returned to Cleveland Center as a Supervisor in November of 2005 and was selected as an Operations Manager (OM) in 2006. He has been the OM for multiple areas, Support Manager for Airspace and Procedures, and has participated in numerous airspace redesign projects. Jim worked with NAV Canada as the Lead overseeing the implementation of the CAATS System at Cleveland Center. In 2009, Jim took a Headquarters position participating as the National TMA En Route Management Representative. Many of his duties included interfacing with contractors, multiple lines of business, ATSAP and Safety Risk Analysis. Jim was born and raised in Western New York and remains a devoted Buffalo Bills fan. Jim and his wife Mary Beth live in Avon Ohio with their three children. Outside interests include reading, golfing, biking, jogging and following the Cleveland Cavs and Indians. Jim believes the most important aspects of being the TMO is separation and safety of aircraft, and taking care of our people. Jim is currently on detail as the ATM of PIT. The acting TMO in his place is Brian Hanlon. He is always available and has an open door policy.
Cleveland Center Support Offices

Training Department
The Training Department provides guidance and support for training in the facility. Support Staff is engaged in daily training activities involving developmental and CPC controllers, implementation of training programs, design and distribution of materials, and management of training data.

Quality Control
The quality assurance staff works to foster individual and group values, attitudes, competencies, and patterns of behavior that contribute to a Safety Culture. Achievement of a safety culture at Cleveland Center is dependent on both quality assurance and quality control. National and facility orders, error reduction initiatives, and staffing initiatives are examples of quality assurance. Performance Verification, Facility Self Assessments, remote or direct monitoring, and Quality Assurance Reviews are examples of quality control. The quality assurance staff prides itself on providing honest and accurate feedback on both individual and system performance that can be used to enhance safety at Cleveland Center.

Traffic Management Unit
Cleveland Center TMU coordinates with the operational areas, adjacent ARTCC’s, and towers to regulate the flow of traffic. The unit implements various Traffic Management Initiatives through the Air Traffic Control System Command Center in Herndon, VA.

TMU also has weather coordination duties: PIREPS, SIGMETS and Center Weather Advisories.

Automation Department
The Automation Department is part of ATO-E Program Operations, and consists of the Field Automation Support Team (FAST). The parent organization is located at the William J Hughes Technical Center and in Washington, DC. The automation group at ZOB (Cleveland Center) provides guidance and support for ATC systems, including local problem analysis, system upgrade and database modification to support ZOB sectorization and traffic flow.

Flight Data Communications
We amend, enter, and remove proposed Domestic and ICAO Flight Plans and send departure messages. We update the altimeters every hour, upper winds 4 times a day, and handle FDC and D NOTAMS. We receive and transmit INREQS, ALNOTS, GENOTS/RENOTS, NOTAMS, Stolen Aircraft Reports, and CWAs. During Host computer shutdown we manually deliver flight plans to the proper area and update the weather every hour.

Administrative and Employee Services
The Administrative and Employee Services (AES) Department is comprised of six employees and one supervisor. The department processes orientations, clearances, benefits, Workers’ Compensation claims, payroll, leave requests, and travel vouchers. It assists employees in the completion of retirement applications. It is the focal for programs such as Performance Management, Merit Promotion, ATCS Health Program, Awards and Recognition, EEO, Budget, and special projects, as needed. The AES also serves as the liaison between the supervisors and Labor Relations staff in the processing of grievances and employee related actions. This small group of people supports a facility of approximately 525 employees.

Plans and Programs
We provide Air Traffic logistical support; assign lockers, distribute headsets, and oversee the distribution of controller chairs among other things, both in the Control Room, and elsewhere throughout the building. We are the Air Traffic focal for frequency and landline issues, as well as VSCS / VTABS, and DSR. We oversee the implementation of new Air Traffic systems including ERAM, and NextGen, and are responsible for the mitigation of construction and equipment installation impacts. If you need it done, “We Do It”.

Airspace and Procedures
The Airspace and Procedures office works closely with the operational aspect of air traffic movement. The office provides oversight for the documentation of agreements on how aircraft will be handled internally and between the various air traffic facilities that work with Cleveland Center. Review and input is also provided for many of the orders that dictate how air traffic services are provided to our customers. Additionally, cartographic services are provided by this office.

Our Expectations of All Employees

Cleveland Center leadership team expects all employees to:

- Come to work, be on time
- Cell phone usage is prohibited in operating quarters-”Turn Off, Tune In”
- Be prepared – mentally and physically
- Understand leave policy and manage your leave appropriately
- Be cooperative and professional
- Treat people with respect and dignity
- Take initiative
- Be accountable
- Lead by example – be a good role model
- Do not tolerate or engage in any form of harassment or discrimination
- Actively participate in training
- Know your airspace and systems, know your equipment
- Use prescribed phraseology/correct facility and equipment names
- Follow rules and procedures
- Be open to feedback – provide honest information
- Be an effective team member

Attractions Abound in Cleveland

Playhouse Square attracts the best in professional theatre, including comedies, dramas, musicals, and more. It is the second largest theater complex in the country. Severance Hall near University Circle is home to the world renowned Cleveland Orchestra. There are fine museums such as The Cleveland Museum of Art, The Crawford Auto-Aviation Museum, The Cleveland Museum of Natural History, The Rock and Roll Hall of Fame and Museum, and more. The Cleveland Botanical Gardens attracts thousands of nature lovers every year.

Downtown Cleveland clearly displays reverence for its history. Public Square is home to the Soldiers’ and Sailors’ Monument, dedicated to servicemen and women who have served their country. Lake Erie provides the opportunity for boating and fishing. The Great Lakes Science Center has many interesting activities and exhibits including an IMAX theater.

Sporting and Special Events

Cleveland boasts three professional sports teams: the Indians baseball, Browns football and Cavaliers basketball teams. Progressive Field and First Energy Stadium, located in the heart of downtown, are readily
accessible by public transportation and offer incredible views of the skyline. Quicken Arena, also downtown, is home of The Cavaliers and also hosts the Cleveland Gladiators arena football team, the Lake Erie Monsters ice hockey team and a variety of concerts and events throughout the year.

**Other Venues**

Other venues in and around the Cleveland area include The Cleveland Metroparks Zoo, the West Side Market, the Christmas Story House and the Horseshoe Casino. The Nautica Pavilion and Blossom Music Center provide excellent outdoor entertainment.

**The Lorain County Area**

Herman Ely came here in the early 1800s, and quickly recognized the area’s unique potential and beauty. It reminded him of the pleasant times he had spent in the Lorraine Region of France. The industries such as shipbuilding, steel making, and fishing brought people, money and railroads to the area. A growing economy attracted more residents, and in 1822 Lorain County was formed from parts of Cuyahoga, Medina, and Huron counties.

Today, some of the original industries still exist, but on a smaller scale. The Lorain Steel Plant is still an industrial icon of the county. Like other landmarks, the steel mill remains part of county history. The heritage of Lorain County is everywhere - from the early home of the "Spirit of '76" painter, Archibald Willard in Wellington, through the Historic Harbourtown 1837 shopping district of Vermilion and the real ship pilot house at the Inland Seas Maritime Museum, to the county seat of Elyria.

Lorain County still offers a panoramic of sites and scenery. On the north, there is the "Jewel of the Port", the Lorain Lighthouse. Further south, in Elyria sits the Hickories Museum, the restored home of industrialist and pioneer automaker Arthur Garford (friend of
Theodore Roosevelt. Oberlin College has the world-famous Conservatory of Music, and was the first college in the country to admit men and women as well as African-Americans to degree programs. A shoreline beach along Lake Erie called Lakeview Park offers spectacular sunsets, historical bathhouses, a stunning rose garden, and views of the Lorain Lighthouse. A part of Avon called French Creek is a center for antiques and crafts, and is becoming known as "the Ruhr of the West Side" for its rapid industrial and commercial growth.

**Recreation**

Lake Erie, Cuyahoga Valley and Cleveland’s Area Metro parks, to name a few, are all part of the cornucopia that is recreation along Ohio’s north coast. From boating, fishing, skiing, jet-skiing and swimming on the big lake or one of the many smaller lakes that dot the landscape; to bicycling the Ohio and Erie Canal towpath or Valley Parkway through the famed “Emerald Necklace” that is the Cleveland Metro park system; to catching G’s on the “Millennium” or obtain maximum speed on the “Top Fuel Dragster” at Cedar Point, the summer can be full and fast paced. White water Kayaking has even resurfaced in the area on a portion of the reclaimed river “that burned”, the Cuyahoga, not so long ago.

If a slower pace is your style hiking through the Cuyahoga Valley National forest, which conceals some interesting geography as well as surprising views of nature this close to the city, may be just the break you need. There are also many island resorts on Lake Erie where you can get away from it all. A visit to Amish country can bring a sentimental reflection of an older way of life and expose you to more of the scenic beauty that most visitors remember from their sojourn here.

Old man winter in Cleveland doesn’t put the stop to action in the great outdoors. Skiing is available in the Cuyahoga Valley at Boston Mills and Brandywine resorts. If a little more elevation change and challenge is what you desire western Pennsylvania and New York have several Ski resorts within a few hours. There are also many venues that provide sledding and ice skating opportunities. There is even a twin chute toboggan run that operates from the day after Thanksgiving to the first weekend in March, weather permitting. Certainly if you are looking for a romantic weekend for two or a mid-winter family get away, you won’t
be disappointed in the many cottage and cabin rentals right around the corner or within a few short hours drive.

When the weather breaks in the spring (or March without snow for the hardy types) golf becomes a real possibility that will take you right through summer and fall. With over 75 courses within 30 miles of Cleveland Center there is more than enough diversity to challenge every skill level many times over. No matter your recreational disposition the Cleveland area has much to offer. If you add a little of your own creativity, who knows, maybe you’ll discover another way to exploit the resources available and be the author of a new leisure time trend.
